

# PENTHOUSE APARTMENT

50 UN Plaza, New York, NY

## **Description**

The 43-story tower at 50 United Nations Plaza, completed in 2015, was developed by Zeckendorf Development and Global Holdings and designed by architects Foster + Partners. The Midtown East building, which was completed in 2015, is across the street from the United Nations.

Ryan Soames Engineering provided the full mechanical, electrical, plumbing, fire protection, and fire alarm engineering design services for the luxury fit-out of the penthouse apartment for a private client. The project included additional cooling systems to support an entertainment space for up to 100 people as well as a supporting kitchen and associated ventilation systems.
