

JERSEY MIKE'S SUBS

Multiple Locations

Description

Founded in 1956 as Mike's Subs at the Jersey Shore and franchised as Jersey Mike's in 1987, Jersey Mike's has a well-established tradition of making among the finest and highest quality sub sandwiches to be found in New Jersey. Most Jersey Mike's sub shops are located in one-story shopping plazas. A typical fit-out requires full mechanical, electrical, and plumbing design. Ryan Soames Engineering works closely with the franchisee, architect, contractors, and town officials to see the project through from conceptual design to the permitting process and construction. With modest amounts of constant exhaust from commercial kitchen hoods and make-up air provided by gas-fired make-up air units, special attention is placed on ensuring the spaces are kept at neutral to positive pressure to eliminate hot or cold air from infiltrating into the space.
