

ALIBABA OFFICE SPACE

860 Washington Street, New York, NY

Description

Alibaba's 10,000 square foot office build-out at 860 Washington Street in New York, NY, includes adaptive reuse of the existing space infrastructure where possible to maintain budget and schedule constraints. The space consists of ground floor main reception, open offices, meeting rooms, open collaboration areas, pantry areas, phone rooms, IT rooms and office support areas with MEP-FP engineering by Ryan Soames Engineering, including underfloor air distribution systems.
