

PLAZA COLLEGE SCHOOL OF NURSING

118-35 Queens Boulevard, Forest Hills, NY

Description

Plaza College is expanding its program offerings to include nursing. State of the art simulation labs, classrooms, and support spaces were designed to ensure student success through hands on experience.

Ryan Soames Engineering was retained to provide MEP-FP design which included vacuum and suction systems, plumbing, HVAC distribution, fire protection and fire alarm coverage, as well as power and lighting controls throughout the work area. The space was updated with new architectural layouts, finishes, and triangular ceiling grid housing lighting, sprinklers, and diffusers.
