

PARADOX MUSEUM

American Dream Mall, NJ

Description

The Paradox Museum in New Jersey is one of sixteen locations globally, including six in North America. Paradox, in NJ, is located in the American Dream Mall in East Rutherford, consisting of approximately 12,000 square feet of one of the most innovative spaces in the field of experiential entertainment.

Ryan Soames, along with Mancini Duffy, have designed the MEP-FP Engineering and Architecture to coordinate with the existing mall base building systems to provide the full construction documents for JRM Construction and their team to build. The Museum is a must-see, must-experience destination for all ages. No matter how many times you visit, each time is a unique opportunity to engage with interactive exhibits and moments of thrilling discovery. The mind-twisting, eye-tricking experiences touch the hearts and minds of those who wish to truly challenge their senses and way of thinking.
